Dear Mr. Heaney, 4/30/99

We urge you to potentially save human lives by supporting a ban on the use of antibiotics in livestock feed. Over-use of medically useful antibiotics creates resistant strains of bacteria, which leaves physicians with no way to [illegible] infections in humans. Hastening animals' resistances to antibiotics also reduces veterinarians' abilities to treat actual illnesses in livestock as well. Using antibiotics as a feed supplement for livestock is wrong.

Thank you,

Heather & Leif Swanson
