Re: Labelling 5/11

I for one am concerned about the safety of the food that I choose to eat. I believe it's my right as a consumer to know if the food that I eat has been genetically altered & or irradiated. Such food poses unknown risks to the environment, to family farmers, & to my health. In May, a lawsuit was filed challenging FDA's policy not to require labels on transgenic foods. I write in favor of this lawsuit. Consumers should not be made unknowing guinea pigs in industrial experiments with potentially dangerous foods. I hope to hear that FDA is following its mandate to protect public health & provide essential information. from
