re. Docket # 98N-1038, "Irradiation in the production, processing and handling of food."

To whom it may concern:

I strongly advocate the retention of the current FDA labeling law regarding the irradiation of whole foods and or ingredients in processed foods.

Consumers who object to eating irradiated foods have the right to know if the foods they are purchasing have been irradiated, therefore the need for clear, unambiguous labeling along with logo.

Yours truly,

Richard McNamara
