To whom it may concern.

1726 '99 MAY 18 A10:53

I am responding to an article in our local newspaper seeking response to whether labeling should continue on irradiated foods. My opinion as a consumer and a parent is that it should most definatly be included. We have every right to make informed decisions about what we ingest. Please count my vote for continuing to include this valuable labeling. Thank you for your time

Sincerely
Kelly Dady
