To the FDA

7241 '99 MAY 25 A10:56

Re: Docket Nr. 98N-1265

I wish to make known my strong disapproval of the Memorandum of Understanding published by the FDA January 21, 1999. As a citizen and healthcare consumer, I'm entitled to have a compounded medication delivered to me when it has been prescribed no matter where I live or travel. I use such a compounded prescription regularly and would have to consider any restriction a serious infringement on my rights. Clearly there is no safety issue involved, and one must question what the FDA is trying achieve. (over)

98N-1265

C-2666

Compounding pharmacists must also be free to serve the public's pharmaceutical needs.

I urge immediate amendment of NOC.

If you require information on why a compounded prescription is necessary for me (and many others) you may contact me.

Very truly yours
Jean E Carter
