To Whom It May Concern:

I wish to register my opposition to the Draft Memorandum which will limit the ability of formulary pharmacies to ship medications for personal use across state lines. Apparently this is to be done by defining "microdiate amount" in such a way to restrict such availability of medically necessary compounded medications by limiting the number of prescriptions which may be shipped across state lines.

I can not conceive of one socially redeeming reason for such restrictions. I do believe this is being done so that the large pharmaceutical companies will have less competition.
