Re: Docket No 98N-1265

To those of concern:

This is the FDA Modernization Act MOU Section 503, which governs the practice of pharmacy compounding & the distribution.

99 MAY 27 A9:55

If the correct move were made, Specialcalty Pharmacies & Doctors would be included in "right to use" them. The Queen of England and (al) use these choices. Medicare money would be saved and many illnesses that modulate from side effects of Chemicals ingested from perscription would be prevented. You know since the use of Chiropractic has be allowed for back (etc) injuries expence & length of loss time has improved. Why do you uninformed people keep trying to find ways to prevent our use of natural alternatives? The Indians & many of the 3rd world countries know of the use of herbs etc & many chemical perscriptions. Make some use of them. Many of So. America & such countries use these alternatives. Read your Bible — there are places that tell you about this.

Respectfully,

Therese Thomas

Just another useless eater
