May 1999

Dear FDA,

I am writing with the hope that in the future I and my children & grandchildren will be able to choose food from the markets, that is as fresh & unadulterated as possible.

259 4 '99 MAY 19 P4:20

I want prominent labeling because irradiation is a process that can change a foods taste-texture, nutrients & holding characteristics.

Don't we as people in this so called free society deserve the choice?

Sincerely
Carol Langston
