Re: Docket # 98N-1038,
"Irradiation in the production, processing and handling of food"

Saturday May 15

FDA personnel

I am a professional Scientist (water quality & quantity issues) who feels strongly that foods which are irradiated should be labeled as such, either in wording or with the "Radura" symbol. The absence of irradiation labeling would be a serious disregard for peoples "right-to-know" because there is some evidence that irradiation destroys vitamins and causes changes in sensory and spoilage qualities of foods that are not obvious or expected by the consumer.

Thank you for consideration of my comment,

Sincerely, Kent M Sherman
