Re: Docket No. 98N-1038

Dear friends,

I am writing to express my deep concern that any and all irradiated food be labeled with a disclosure statement — either "treated with radiation" or "treated by irradiation — and carry a radura symbol. It is extremely important that such processing of food be clearly labeled and assure the public's right to know. Any attempt to modify or drop the labelling should be disregarded. Our health is at stake and the government should not increase risk to our health by permitting radiation of food without consumer's knowledge.

Sincerely,

Suzanne R. Carlson
