Re: Docket No. 98N-1265

I very strongly disapprove of the MOU as currently drafted. It is not acceptable by my family + myself as currently written + should be amended.

You are infringing on the rights of physicians + patients to obtain healthcare products from the provider of their choice. You infringe on the right of compounding pharmacies to continue to serve the public's medical needs.

I personally had problems w/ topic reactions to several patented (~~to~~ (noncompounded) drugs. The MOU places a gag order on pharmacies who specialize in compounding drugs.

Many of the people involved in the ~~of the~~ original legislation + familiar w/ the Modernization Act feel that the MOU does not accurately represent the original intent of Congress. Please allow the compounding pharmacies to continue supplying the public's needs.

Sincerely,

98N-1265
