5/13/99

Dear Commissioner Henney,

I understand that a lawsuit has been filed challenging the FDA's policy not to require labeling of food products that are the result of genetic altering. I am writing in support of the demands of this lawsuit for safety testing and complete & prominent labels. Since no one knows the long term effects of genetic altering, I believe the public has a right to know and chose what foods they feel are safe to eat! Your part in ensuring & protecting the public health is to not allow foodstuffs into our markets that may be harmful without our being aware of it.

Nutrition labeling pales in importance when compared to labeling whether a food product is the result of genetic engineering!

Sincerely,
Kathy Lusco C137
