I am writing to urge you to strongly consider the U.P.C.'s petition to ban the forced molting of egg laying hens. I personally oppose forced molting because it is one of the cruelest aspects of an already ugly business of factory farming animals.

It seems obvious the forced molting is a benefit only to the egg farmers & a detriment to consumers (increased salmonella risk) & of course the birds themselves who are starving & in some cases dying because of this barbaric & totally inhumane manipulation of nature.

I currently boycott the egg industry (& all animal exploiting businesses) due to the dirty & cruel way they are run. Any changes you can make will be a move in the right direction for America. C1529
