Dear Commissioner Kennedy,

5349 99 MAY 21 P2:08

Please, make decision to identify irradiated foods for us to be able to choose.

I am 77 yrs old and I am baking bread for most of my life. I like to use compressed yeast instead of dry.

Lately I experienced noticeable slowness of activating yeast before I mix into the dough and also unusual slow rising.

I am not alone, my friends in baking are complaining about this. Now we start to think that yeast might be irradiated without our knowledge. Please, help us to choose and enjoy living in democratic Country! Thank You! Sincerely Bonnie Tribys
