Dear FDA/Dockets: (HFA-305)

I would like the MOU amended: It and the Compounding Section 503A of the Modernization Act are presently too restrictive.

We should not all have to use non-compounded drugs, i.e. patented drugs benefiting pharmaceutical companies. Is their profit motive what has steered the original intent of Congress in the wrong direction now? Natural ingredients and specialized treatments should be available for me to use, locally, or by mail.

Also I do not want to see the valuable knowledge and skills of physicians and pharmacists censored by restrictive legislation and decisions.

98N-1265 We absolutely need the existence and choice of compounded and non-compounded drugs, equally. Protect consumers and ensure the survival of both.

Sincerely, Jan Holt
