5-30-99

Dear Dr. Sundlof:

Please ask the FDA to ban antibiotics used to promote growth in farm animals.

Why? Because it creates drug resistant bacteria, promotes inhumane factory farming, makes it difficult to treat drug resistant animal carries over to people who eat their meat, increases morbidity in humans.

I am also against the use of BiH in cows which causes them suffering and ill health.

Please help us & the animals, I.M.C
