To
Commissioner Jane E. Henney,

I ask you to ban the use of medically useful ~~animal~~ antibiotics in animal feed used in order to promote growth in the animals. Adding antibiotics to feed can cause bacteria to be resistant to that antibiotic. That can result in doctors being unable to treat life-threatening bacterial infections in humans.

I strongly support the petition filed by the Center for Science in the Public Interest (CSPI).

It is very important to change that practice of adding antibiotics to animal feed.

Thank you for your attention.

Sincerely,
Mathilda Apsit
