Dr. Jane Henney, Commissioner, U.S. FDA

Dear Dr. Henney, '99 MAY 25 P1:27

Antibiotic resistance is a grave threat to human health. It is caused largely by over-use and mis-use of antibiotics. Using human antibiotics in food animal feeds is a principal culprit and totally unnecessary, i.e. a mis-use of these drugs.

Therefore I ask you as Commissioner of the US FDA to ban the use of antibiotics in animal feeds with all due haste.

Sincerely,

Tannette Sawyer
