[redacted]

Dear Dr. Friedman:

I strongly urge you to classify meat from downed animals as adulterated. This would remove the profit incentive of keeping "DOWNERS" alive until slaughter. In addition to compassion for suffering animals, there are food and safety risks associated with disabled, diseased or dying animals. To let "downers" suffer in this manner is unconscionable.
Docket No. 98P-0151/CP1.

Sincerely,
Jan Clase
