To whom it may concern:

I would like to request that you register my strong opposition to dropping labelling of irradiated food!

I work in the health care field and see many, many, people who are suffering ill-effects from various forms of radiation and high frequency electrical exposure. Our medical community does not yet recognize this connection and so does not see the risk, BUT IT WILL.

Please Label all irradiated food so that at least those of us who are trying to become more aware of our health issues can choose based on complete information!

Thank you,

Teresa San Miguel
