Refer to Docket #98N-1038. "Irradiation in the production, processing & handling of Food."

I feel is important, if not necessary to retain the labeling "Treated with radiation"

Also, keep the radura symbol, however I dont recall seeing this on items. There are some people in the US that does not read well, so keep the symbol.

And lastly do not let labeling expire

Consumers would be misled by the absense of a label.

If I'm buying irradiated food I wish to know as I may treat it differently. i.e. it may be older, once radiated the smell of bateria will not make it smell old.

98N 1038

Thank you for reading & considering my ~~opinion~~ opinion.
