Dear FDA,

Regarding HFA 305.

You must not use taxpayer dollars for any xenotransplants.

Remember all the many pig viruses that killed tens of thousands of people - more than the Black Plague + Aids. Instead, invest heavily into preventive medicine. Increase the pool of human organs as many European countries have done.

I demand that the Dept. of Health + Human Services ban xenotransplantation from all non-human species now.

Sincerely, Martine Sankari

99P-0557 C19
