Dear Commissioner Henney,

I strongly urge the FDA to BAN human antibiotics in animal feed. The current overuse of antibiotics both in human medicine and animal [illegible] quickly curtailed. We are rapidly developing super, drug-resistant bacteria — especially Salmonella strains. It is not enough to merely limit NEW uses of antibiotics; I urge you to revoke approval for the existing use of 6 antibiotics in animal feed as recommended by the World Health Organization and the CDC! Meat production by agribusiness today is a disaster and MUST CHANGE!
