Dear Jane Henney,

I implore, beseech, beg, insist, plead and demand that you act on the HFA petition to put an end to the practice of feeding dead animals to other farm animals—

Thanks to the lack of protection I feel from the government, I now rarely eat meat— It doesn't take a rocket scientist to know not to eat meat laced w antibiotics or the potential for mad cow disease. It's a violation of natural laws and such cruelties of housing farm animals causes me shame + pain— When your grandchild is afflicted, maybe

99P-0033

C 101

then you'll see it as a reality and a danger that every American should be protected from.

Thank you
