Re: Docket # 98N-1038.

Please require all irradiated foods to show prominent labeling using the terms irradiation or irradiated and the use of the radura symbol. I am strongly opposed to alternative terms such as electronic pasteurization. They are misleading and should not be used. The absence of a label would be unfair and misleading because irradiation destroys vitamins. I do not approve of irradiation so I deserve to know what foods not to buy.

Thank you for your consideration in this matter.
