Dear FDA

Do NOT irradiate my food!

Why do you feel the need to even consider this. STOP thinking about this! You are being pressured by food manufacters and you are considering acting on there behalf by irradiating the publics food source. We the public have everything to loose and nothing to gain.

And then NOT labeling the food as being irradiated is very deceitful - & misleading. If you tell us the vitamin, fat & mineral content of foods but NOT that you have altered the chemical composition, is criminal!

Who are you working for? the american public is already suffering from rampant Cancer and you will increase this epidemic by your actions.

Do NOT irradiate my food!

And at least let me know which foods you irradiate.

Please increase the comment period past May 18th.

Thank you

C2637
