Jane E. Henney
U.S.F.D.A.

C085 '99 JUN -7 P2:11

Dear Commissioner Henney:

Thanks to the U.S.F.D.A. for the "Nutrition Facts + Ingredients Labeling.

1. Now, I urge you to require Legible, Front-of-package disclosure of foods which have been irradiated using radioactive materials. The unnecessary hazards of proliferation, transport, use, and eventual disposal of radioactive materials is unconscionable (even though the treated food is not radioactive.)

2. Is the procedure known as "Electron Beam Irradiation" being expedited? It zaps the microbes without using any radioactive materials.

98N 1038

3. And, I'm sure the U.S.F.D.A. C2781 inspection experts know dozens of other ways to steam, boil, scrub, etc.

Thank you.

Miss W. Gertrude Josendal
