6-2-99

Dear Ms Henney:

First, I am surprised that I am writing this letter to another woman. This issue is so electric I cannot believe it is still going on. Why are we still feeding dead animals to cows? Do you not care about about people, children + animals health? Most woman deal much more rationally when it comes to our health + health of our children than men. I demand that you act on the HFA petition of feeding dead animals to other farm animals.

Sincerely, Carmita Frost
