6/4/99

Dear Mr. Henney,

I'm writing to urge FDA '99 JUN 14 P1:52 on antibiotics in animal feed. When you get sick + antibiotics are useless to help you, you'll wish our government hadn't allowed agriculture to render these important tools useless. Let's stop lagging behind Europe on this issue + be a leader. Resistance to antibiotics is increasing. Abide by the recommendations of the WHO + the CDC.
