I am writing concerning the labeling of irradiated foods. I feel strongly that irradiated ingredients should be labeled, using the word "irradiated", and that this labeling requirement should be on-going & not subject to expiration.

Part of the FDA's job is to ensure that consumers have the information we need in order to make informed decisions about the foods and drugs we choose. That's why we label food!

Please help us be informed consumers. Thank you.

Sincerely,
Hannah G.M. Bloch
