6/17/99

Dear People:

I am writing re: The MOU recently drafted by the FDA Administration which severely limits the practice & interstate distribution of compounded drugs.

FDA 99 JUN 22 A10:18

I get my Estriol from The Women's International Pharmacy in Minnesota. It is a combination of estrogen & progesterone that I have been using for years. It is very inexpensive as some local doctors have told me and I would like it to continue. They keep me on an even keel and I am able to live a functional, happy life. They are made of soy & natural chemicals or animal hormones and are safer and more natural and save me from having to use the only other drug that is on the market which is too strong for me & keeps me awake at night (which is Premarin.) I feel the makers of Premarin are in on these restrictions as they were when the generic Estrogens were cut out because of a problem with inaccurate amounts.

Please consider ~~us~~ us the consumers in this instance. I am very contented with the way things are & do not want a change!

Thank you for your attention to this matter!

Sincerely,

Frances Sullivan
