FDA, re docket no. 99D-0557 '99 JUN 23 P1:01

Madam or Sir,

Just a quick note to express my professional opposition to xenotransplantation from any species to human. The influenza epidemic of 1918 is a superb example of the dangers posed to human health by non-human-infecting viruses.

Financial + moral issues aside, the endeavor is unsafe.

Nancy L Harrison MD
