Dear FDA:

I'm writing you this to demand that you require full labeling on all future irradiated or genetically engineered foods!!

I personally don't give a rat's ass what they do to food (!!) I just want a label on it letting me (and everyone else in the world) know what has been done to it!!! A prominent label without any sort of expiration date for these labeling requirements!! on all irradiated or genetically engineered foods!

As the Food and Drug Administration, I feel your purpose is to inform and protect the people of this country from the "greed merchants" who would willingly try to foist anything on the people.

92N-0139

C5613

THE information isn't in YET on the SAFETY of IRRADIATED or GENETICALLY ENGINEERED FOODS, AND I AM UNWILLING to BECOME A GUINEA-PIG FOR the FOODS INDUSTRY!!

Democracy CAN only EXIST WITH A fully informed populace, AND we CAN'T BE fully informed on THIS issue UNLESS you put STIFF LABELING REQUIREMENTS into your future policies REGARDING THIS ISSUE!!

Sincerely,

CROSS FILE SHEET
