Docket# 98N-1038

17 June 1999

FDA Personnel,

I demand the continued labeling of irradiated food and strongly oppose any future expiration of this requirement.

99 JUL -7 P2:10

The proposal of "cold pasteurization" or "electronic pasteurization" are deliberately misleading labels and must not be allowed.

I want the choice available to me by proper labeling of these potentially dangerous foods. If you want to eat them, go for it but don't interfere with my right to know.

Help keep alive the opportunity to choose in our United States. Don't become a part of the destruction of this cherished right in our country.

Thank You,

Duane Underwood
