It is of most importance to my family & myself to have the Continued Right under our Constitution. to Know Wheather the foods we purchace are exposed to radiation from Cobalt-60 or Electron Beam Gun Sources

Exposing the American food Supply to Radiation Without consumer Knowledge is dangerous and unacceptable

Let those that are proposing this injustice to the consumer - place themselves in a long term study that should be done & even then the consumer has the right to choose how his food is being tampered and exposed to processes that decrease its nutritional Wholesomeness

Thank you -

Esther C. Leon R.N.
