Docket #98N-1038

Please REJECT the proposals which would allow us to buy irradiated meat unknowingly. Euphemisms such as "cold pasteurization" + "electronic pasteurization" are not really informative. We need the right to choose. ALSO reject the idea that there should be a future end to this labeling.

This procedure (irradiation) allows meat packers to include feces and other filth in our meat knowing it is biologicly dead + will not cause bacterial disease. I don't want to eat shit even sterile shit.
