Mr. William Hubbard
Food and Drug Administration
Docket No. 98 N-1038
Irradiation in the Production, Processing
and Handling of Food
5630 Fishers Lane, Room 1061
Rockville MD 20852

Dear Mr. Hubbard:

I am concerned about the possible weakening or elimination of labeling requirements for irradiated food. I feel strongly that any foods that have been irradiated (or any foods with ingredients that have been irradiated) should have both....

- a written statement indicating irradiation
- a radura, the international symbol of irradiated food.

Euphemisms should not be allowed.

We consumers have a right to know how our food has been processed. Please ensure that labeling requirements are strengthened, not weakened.

Thank you.

Sincerely,
Marjory M. Donn
