Re: Docket #99D-0557

Friends,

Why do humans feel they have the "right" to harvest organs from other animals? Why are their lives any less precious than ours?

I strongly oppose any xenotransplant research because:

(1) It is immoral and inhumane, and

(2) It is irresponsible because of the threat of inter-species virus transmission.

99D-0557

C 195

We should, instead, be aggressively promoting preventive medicine and increasing human organ donation rates.

Thank you,
M. L. Ingram
