To Whom It May Concern:

7028 '99 JUL 15 P2:25

I am urgently requesting that all food be labeled irradiated NOT COLD Pasteurization. I have no intention of buying ANY irradiated foods — I do not want my family eating them nor the students I teach. No one should eat them; therefore, I will be certain that everyone I know understands the dangers of irradiated food and in particular the DANGERS of the toxic waste that the food process creates.

I have a 5 yr. old nephew whenever possible he eats home grown or purchased ORGANIC food. His health as well as the health of all children is very important to me.

The American people deserve to KNOW the TRUTH. It is unethical for irradiated food to be sold without very clear identification.

Sincerely

Trudy Durham OP.
