To Whom It May Concern:

As a consumer I believe I have the right to know what I am eating. All irradiated food should continue to be labeled. Therefore I am against Docket # 98N-1038, the proposal to allow the sale of irradiated food without labeling. "Cold pasteurization" does not tell the consumer it is irradiated food.

I do not wish to eat or buy this type of food because of the chemical changes that have taken place and also the possible harmful long term effects of radiation exposure.

Sincerely,

Mary Elizabeth Fallon
