To The FDA 0765 '99 JUL 16 A11:05
RE: DOCKET NO. 98N-1265

I am writing as a concerned consumer of health care services to register my disapproval of the Memorandum of Understanding published by the FDA on January 21, 1999.

In the present form, the MOU, and the Compounding Section 503A of the Modernization Act severly restricts my rights as a patient and the physicians rights to obtain health care products from the providers of our choice.

My prescription is not compounded in my state. Due to my health conditions I have to have a compounded prescription. I cannot use a noncompounded prescription. It seems to me there should be equal treatment under our laws for both types of prescriptions and for the Doctors

98N-1265

C 3882

who prescribe them and the pharmacists who compound them.

As a healthcare consumer I should not be restricted from recieving a compounded medication that is prescribed for me, regardless of where I live and where it is sent from.

AMEND THE MOU!
