RE: Docket # 98N1038 IRRADIATION of food

It is with grave concern for the well being of the human race, our environment, and our right to know what we eat that I register very strong protest to food irradiation of any kind, and most specifically, the attempt by the nuclear industry at more subterfuge — no labeling or weakened labeling of foods subjected in any way to radiation!

The majority of Americans do not want radiated food! The minority remaining, with education of the facts of the inherent horrors of radiation, would join the rest of us in protest.

Please read the books written by scholars of nutrition. This is BAD for us!

98N-1038 Lastly, food irradiated should and must be labeled with the RADURA SYMBOL and words indicating "TREATED BY IRRADIATION." The nuclear industry has so much to hide and so much money to lose — this is why they fear labeling. Please don't perpetuate this subterfuge!
