Greetings! I have just become aware that, with the exceptions of 7 known toxins, the U.S.F.D.A. is not regulating the ingredients in cosmetic + personal care products (i.e.; toothpastes, shampoos, etc.). This is outrageous. Cocamide Dist, Sodium Laureth Sulfate, Sodium Laureth Sulfate, Propylene Glycol + according to Sen. Ed Kennedy + the General Accounting Office of Congress, 121 other ingredients are suspected to cause cancer + are yet available to manufacturers + consumers.

Please do your job + test these ingredients conclusively before allowing their use

Disturbing the peace !
