It is inconceivable that the American people may be deprived of knowledge as to the irradiation of their food -- or may be deceived by nomenclature such as "cold pasteurization" or "electronic pasteurization".

If irradiation proliferates as a result of ignorance or lack of labeling, a new source of nuclear waste to poison us will emanate, as thousands of radiation plants will be built, operated with deadly Cesium and cobalt-60.

98N-1038

C4187

You must stop this atrocity now!
There must be prominent use of the terms "irradiation" or "irradiated" and use of the Radura symbol.

I expect reassurance from your agency.
