Dear Dr. Henney

I am writing about the use (abuse) of antibiotics in animal husbandry (cattle, chicken). As a physician I am deeply concerned about the emerging crisis of antibiotic resistance in part due to this use in animals for food. This cannot continue! Although I appreciate the powerful vested interests we'll have to fight, now is the time to do it with a Democratic Administration. I urge you to set up a vigorous campaign against this use. A good chance to become a memorable FDA leader!

99P-0485

Thank you

C1315

Sincerely
Jo
