Dear Dr. Honney

June 24, 1999

Hello. I am writing you to urge stronger regulations on CAFO's (confined animal feeding operations) These huge factory farms carry many of the same pollutants as sewage treatment plants & manufacturing plant without any of the Clean Air and Clean Water permit requirements. Additionally these plant/farms use tons and tons of antibiotics. These cause more of a public danger than the pollution because bacteria become resistant. Think of all the infectious diseases that require the use of antibiotics: tuberculosis, staph, pneumonia and tens of others. All these health problems will become harder to treat. Please, support strong, strict regulation of CAFO's.
