Dear Sir or Madam:

I have **new** allergies to six house molds, and am on anti-epilepsy medication to try to contain and reduce my allergic reactions to molds and perfumes.

Please write me as soon as possible with the toxic chemicals + MSDS sheets for these chemicals, if they are available, that

99P-1340

C 220

I have just learned are in the "Eternity" perfume.

Please give me the scientific names of these (toxic) chemicals; and I would appreciate knowing whether they have been tested for a) consumer safety and b) on any animal models. If not, why not?

Thank you for your time,

Wendy Seeger
