ref: Docket #98N-1038, Irradiation

7/13/99

To whom it may concern

6327 '99 JUL 22 A9:49

If food is going to be irradiated it must be clearly labeled with the radiation symbol as well as public information to what has been done to that product. We as consumers have the right to know how our food is treated. Personally, I don't feel irradiating food is acceptable and will never purchase any in the future. This must be stopped. Also the term "cold pasteurization" is not acceptable.
