Dear Mr. Jaffe:

I support Docket 98P-0203/CP: the petition to ban the forced molting of layer hens.

The fact that we use these animals as though they were put on Earth for us is bad enough. The way they are being treated is akin to being in a concentration camp. Imagine being trapped with five other people in a cage with floor space the size of a newspaper.

The natural lifespan of a chicken is 15-20 years. In a factory farm the maximum lifespan is two years.

Please, show them a little kindness. Ban forced molting.

For the animals,
Staci Stark, PETA member
