July 7, 1999

Dear Ms. Henry,

'99 JUL 21 A11:27

I am contacting you to express my great concern with the possibility that foods that have been genetically altered and engineered may reach the marketplace without being properly labeled so that consumers can make informed choices. Therefore, I am strongly urging you to take whatever steps are necessary to ensure that the following products are clearly labeled: 1) genetically engineered foods 2) products that contain genetically engineered foods.

Science is not certain that these foods are safe for either short term or long term use. Until that question is answered with 100% certainty, I urge you to use your good offic to ensure that I can make an informed choice when I shop for food to feed my family. I would appreciate hearing from yo with whatever steps you can

take to ensure that this happens. My health and my family's health is of prime concern to me.

Sincerely

Jessica Joseph
